

Midwest Express Center

Milwaukee, Wisconsin

This three-level state-of-the-art building was designed to replace existing convention facilities and also connect two major hotels with elevated walkways. At 667,000 square feet the Midwest Express Center occupies four city blocks and blends with historic downtown Milwaukee.

"The building itself feels at home with its neighbors...I compliment the architects. Their work is important." (Governor Tommy Thompson, Midwest Express Center Grand Opening, July 24, 1998) Brick used for this project were simulated Belcrest 330 Utility and 8621 accent brick.

Clarksburg Municipal Building

Clarksburg, West Virginia

Owned by the City of Clarksburg and designed by U.D.A. Architects of Pittsburgh, PA, this 32,700 square-foot building houses numerous city department headquarters. Brick chosen for the project include 503-505 Smooth accented with Midland Blend Smooth.
